

Smart and mobile with SAP

SAP Fiori®

SAP Fiori - more productivity in sales and service

SAP gives you full control over your business processes – through precise modeling of master data, transactions, analyses and information. The question now is how to most effectively design your workflows to increase productivity.

- How can I complete routine tasks intuitively and quickly?
- How can I access, update and analyze SAP data with my mobile device?
- How can I create a simple user interface, one the user quickly understands and enjoys using?

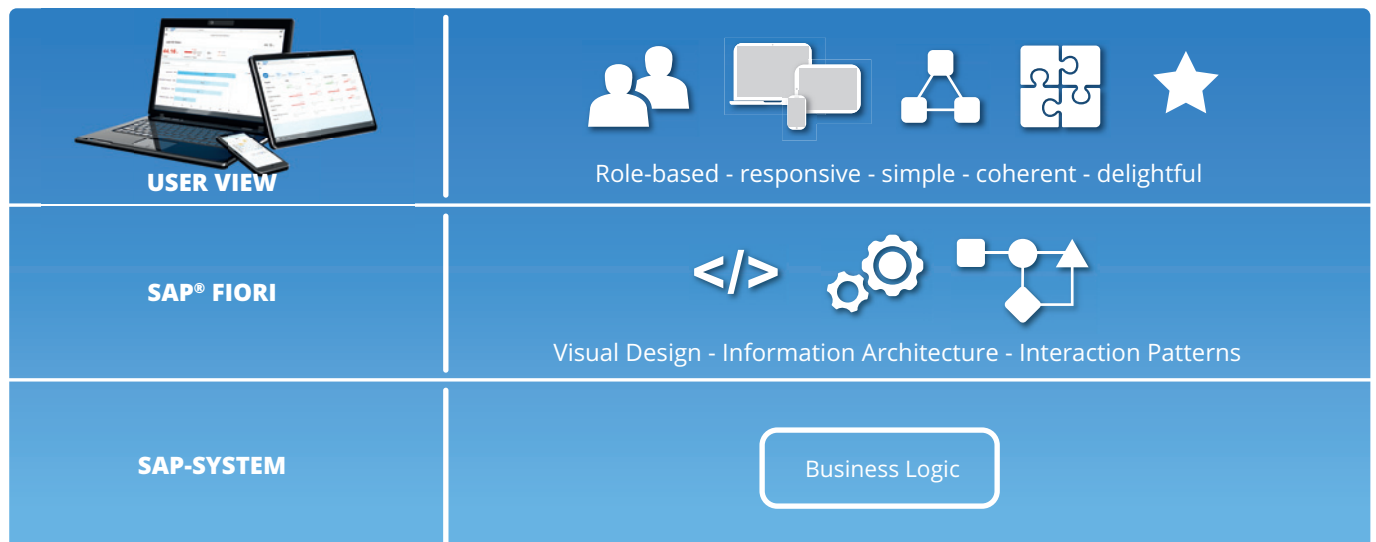

The user experience plays an important role. SAP Fiori® provides your employees with an advanced, intuitive SAP interface that supports them individually. Work becomes enjoyable and the tasks are accomplished in no time. Even occasional users will find SAP easy. With the mobile applications, your staff members in sales and service accomplish routine tasks quickly between tasks. Clearly structured reports are available to the management – anytime and anywhere.

Role-based - responsive - simple - coherent - delightful

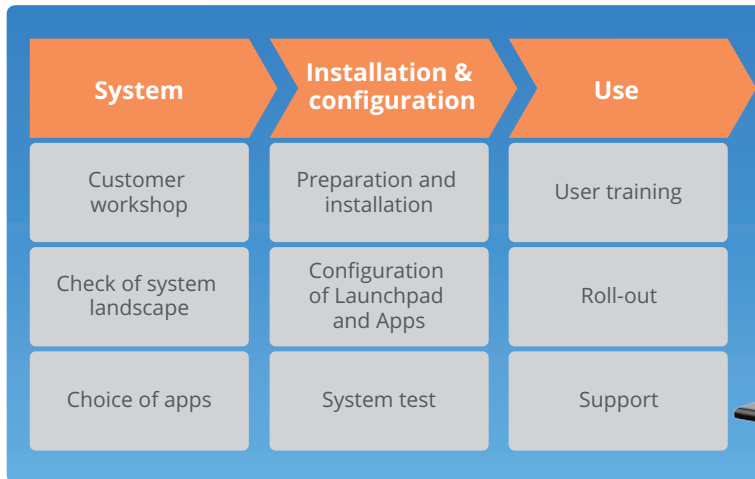

The SAP Fiori apps bundle complex transactions for individual roles. Only the data and functions related to the particular role and task are displayed, with a consistent user interface and arranged in a clearly structured launchpad.

Consistent User Experience (UX)

SAP-Fiori technology ensures that all applications provide you with a consistent user experience. You can adapt, extend and develop apps according to the specific requirements of your business.

SAP-Fiori features

Implementing SAP Fiori Apps in just a few steps

Quick access to the mobile IT world

More than 300 Fiori apps, design principles, developer tools and a role and authorization system enable quick and cost-effective access to the mobile IT world. Fiori apps run on smartphones, tablet and desktops.

Your benefits with SAP Fiori

- Immediate added value based on your existing business processes
- Consistent user interface of SAP applications
- Access to all key enterprise processes anywhere and anytime
- Easy to extend – future-proof
- Increased productivity and data quality through ease of use, especially for infrequent users
- Greater returns from your SAP software investment: no additional license costs, no training costs.

We offer

- Requirements analysis and installation of SAP Fiori on your SAP system
- Implementation of existing SAP Fiori standard apps and customized enhancements
- Development of customized apps based on SAP Fiori
- Development of customized Fiori-like apps (SAP UI5)

Your benefits from proaxia

- Experience with the new SAP Fiori technology, UX design and role-based solutions
- Expertise in SAP back-end systems, architecture and processes
- Close cooperation with SAP for innovative UX solutions proaxia was a finalist for the SAP Pinnacle Award **«Mobile Innovator of the Year»**.
- Support ranging from practical help in getting started to complex customer-specific applications and assistance over the entire application life cycle

References

- Mobile check-in at EvoBus (Fiori App)
At the EvoBus Servicecenters, buses are checked in for maintenance directly at the vehicle, including customer signing of the order. Optimized interfaces with process guidance and speech input enhance quality and effectiveness.
- Sales commissioning at AMAG (Fiori-like application)
Easy approval process for salespeople and sales managers. The intuitive interface offers the salesperson a quick overview of commission terms, allowing correction requests and commission-splitting within teams and the sales manager then approves the commissions.
